Cloud Engineer and Automation Enthusiast | Querétaro, Mexico

EDUCATION

Instituto Tecnológico de Estudios Superiores de Monterrey
Bachelor of Science in Mechatronics Engineering Cyber-Physical System

Santiago de Querétaro, QRO
Aug. 2020 – Jun 2024

CERTIFICATIONS & LANGUAGES

Certification: AWS Certified Cloud Practitioner

Languages: English (C1, Cambridge) | French (B1, Collège International de Cannes) | Italian (Basic)

EXPERIENCE

SRE – Axway Secure Transport

Aug. 2025 – Present

Tata Consultancy Services

Querétaro, México

- Perform SRE responsibilities for Axway Secure Transport, focusing on service reliability, incident resolution, availability, and operational stability.
- Participate in the migration of AWS-hosted Linux servers from RHEL 7 to RHEL 9, leveraging Terraform (IaC) and GitHub for infrastructure management, version control, and deployment automation.
- Automate AWS infrastructure provisioning using Terraform, with hands-on experience across EC2, S3, and IAM.
- Develop CI/CD workflows using GitHub Actions and containerize applications with Docker to support consistent and repeatable deployments.

Cloud Support Engineer – Axway Transmission Team

Sep. 2024 – Present

Tata Consultancy Services

Querétaro, México

- Support enterprise clients using Axway Secure Transport, troubleshooting Managed File Transfer (MFT) services and ensuring secure and reliable data exchange.
- Troubleshoot Linux-based production environments, resolving user access, file transfer failures, system configuration, and application-related issues.
- Support AWS-hosted environments and cloud infrastructure, with hands-on experience across EC2, S3, and IAM.

PROJECTS

AWS Cloud Infrastructure & CI/CD | AWS, Terraform, GitHub Actions, Docker

Dec. 2024 – Jan. 2025

- Provisioned AWS infrastructure using Terraform and implemented CI/CD pipelines with GitHub Actions for automated deployments.
- Containerized applications with Docker to support consistent and repeatable deployments across environments.

Cloud-Based POS Application | AWS, Python, Docker, Database

Jan. 2026 – Present

- Developing a cloud-based point-of-sale system on AWS with inventory management, barcode tracking, backend services, and database integration.
- Designing the application around scalable cloud infrastructure and containerized services for reliable deployment and operation.

Retail Sales Data Pipeline | Databricks, PySpark, AWS S3, SQL

2026

- Building a data pipeline using Databricks, PySpark, and AWS S3 to ingest, transform, and analyze retail sales data.
- Implementing structured data transformations and Delta Lake tables to support reliable data processing and analytics.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3, IAM, Lambda, DynamoDB, RDS, API Gateway), Linux (RHEL 7/9), Windows Server

DevOps & Automation: Terraform, Git, GitHub Actions (CI/CD), Bash, Python, Docker,

Data & Databases: Databricks, PySpark, SQL, PostgreSQL

Networking & Protocols: TCP/IP, DNS, VPN, SFTP, FTPS, HTTP/HTTPS, MFT
